

Consultation questions

The IIRC welcomes comments on all aspects of the Draft International <IR> Framework (Draft Framework) from all stakeholders, whether to express agreement or to recommend changes.

The following questions are focused on areas where there has been significant discussion during the development process. Comments on any other aspect of the Draft Framework are also encouraged through the questions.

Please provide all comments in English.

All comments received will be considered a matter of public record and will be posted on the IIRC's website (www.theiirc.org).

Comments should be submitted by Monday 15th, July 2013.

Key Points

If you wish to briefly express any key points, or to emphasize particular aspects of your submission, or add comments in the nature of a cover letter, then the following space can be used for this purpose. Please do not repeat large amounts of material appearing elsewhere in your comments.

Chapter 1: Overview

Principles-based requirements

To be in accordance with the Framework, an integrated report should comply with the principles-based requirements identified throughout the Framework in bold italic type (paragraphs 1.11-1.12).

1. *Should any additional principles-based requirements be added or should any be eliminated or changed? If so, please explain why.*

No

Interaction with other reports and communications

The <IR> process is intended to be applied continuously to all relevant reports and communications, in addition to the preparation of an integrated report. The integrated report may include links to other reports and communications, e.g., financial statements and sustainability reports. The IIRC aims to complement material developed by established reporting standard setters and others, and does not intend to develop duplicate content (paragraphs 1.18-1.20).

2. *Do you agree with how paragraphs 1.18-1.20 characterize the interaction with other reports and communications?*

Yes. With the exception of 'providers of financial capital as the primary audience'. We are of the opinion that the primary audience of the integrated report and other communications resulting from <IR> should be much broader and should include all stakeholders who are material to the ability of the institution to create value.
--

3. *If the IIRC were to create an online database of authoritative sources of indicators or measurement methods developed by established reporting standard setters and others, which references should be included?*

<ul style="list-style-type: none">• Impact Reporting and Investment Standards (IRIS) of Global Impact Investing Network (GIIN)• GRI 4.0 / SASB

Other

4. *Please provide any other comments you have about Chapter 1.*

Chapter 2: Fundamental concepts

The capitals (Section 2B)

The Framework describes six categories of capital (paragraph 2.17). An organization is to use these categories as a benchmark when preparing an integrated report (paragraphs 2.19-2.21), and should disclose the reason if it considers any of the capitals as not material (paragraph 4.5).

5. *Do you agree with this approach to the capitals? Why/why not?*

Yes, we agree. The capitals portray all the relevant aspects of corporates in their value creation so in that sense, assessing and reporting which capitals are material for the organisation (and which are not and why not) is logical.

6. *Please provide any other comments you have about Section 2B?*

More guidance on how to incorporate the analysis of the capitals in an annual report, with practical examples would be appreciated.

Business model (Section 2C)

A business model is defined as an organization's chosen system of inputs, business activities, outputs and outcomes that aims to create value over the short, medium and long term (paragraph 2.26).

7. *Do you agree with this definition? Why/why not?*

Business model (Section 2C) continued

Outcomes are defined as the internal and external consequences (positive and negative) for the capitals as a result of an organization's business activities and outputs (paragraphs 2.35-2.36).

8. *Do you agree with this definition? Why/why not?*

In principle yes. It would be helpful to distinguish explicitly in guidance in how to treat externalities (i.e. outcomes that do not directly affect the value creation ability of the company itself materially but do so for others).

9. *Please provide any other comments you have about Section 2C or the disclosure requirements and related guidance regarding business models contained in the Content Elements Chapter of the Framework (see Section 4E)?*

Other

10. *Please provide any other comments you have about Chapter 2 that are not already addressed by your responses above.*

Chapter 3: Guiding Principles

Materiality and conciseness (Section 3D)

Materiality is determined by reference to assessments made by the primary intended report users (paragraphs 3.23-3.24). The primary intended report users are providers of financial capital (paragraphs 1.6-1.8).

11. *Do you agree with this approach to materiality? If not, how would you change it?*

We don't agree with this approach. We believe the primary intended report users should be defined as: "stakeholders who are material to the ability of the institution to create value".

We would propose instead of 'derived materiality', i.e. the assessment of senior management of how things affect the assessment of report users, to 'direct materiality', i.e. whether something through the eyes of senior management affects the ability to create value.

12. Please provide any other comments you have about Section 3D or the Materiality determination process (Section 5B).

Reliability and completeness (Section 3E)

Reliability is enhanced by mechanisms such as robust internal reporting systems, appropriate stakeholder engagement, and independent, external assurance (paragraph 3.31).

13. How should the reliability of an integrated report be demonstrated?

Through external assurance, and the application of external accounting standards and frameworks to data presented.

14. Please provide any other comments you have about Section 3E.

Other

15. Please provide any other comments you have about Chapter 3 that are not already addressed by your responses above.

Chapter 4: Content Elements

16. *Please provide any comments you have about Chapter 4 that are not already addressed by your responses above (please include comments on the Content Element Business Model [Section 4E] in your answer to questions 7-9 above rather than here).*

Chapter 5: Preparation and presentation

Involvement of those charged with governance (Section 5D)

Section 5D discusses the involvement of those charged with governance, and paragraph 4.5 requires organizations to disclose the governance body with oversight responsibility for <IR>.

17. *Should there be a requirement for those charged with governance to include a statement acknowledging their responsibility for the integrated report? Why/why not?*

Should not be necessary if the integrated report is prepared in accordance with the principles based requirements (bold italic type) of the Framework and this is communicated as such.

18. *Please provide any other comments you have about involvement of those charged with governance (Section 5D).*

Credibility (Section 5E)

The Framework provides reporting criteria against which organizations and assurance providers assess a report’s adherence (paragraph 5.21).

19. If assurance is to be obtained, should it cover the integrated report as a whole, or specific aspects of the report? Why?

In order for integrated report to be reliable, material and interconnected at the same time, the whole integrated report should at least get limited assurance.

20. Please provide any other comments you have about Credibility (Section 5E). Assurance providers are particularly asked to comment on whether they consider the Framework provides suitable criteria for an assurance engagement.

Other

21. Please provide any other comments you have about Chapter 5 that are not already addressed by your responses above (please include comments on the materiality determination process [Section 5B] in your answer to question 11 above rather than here).

Overall view

22. *Recognizing that <IR> will evolve over time, please explain the extent to which you believe the content of the Framework overall is appropriate for use by organizations in preparing an integrated report and for providing report users with information about an organization's ability to create value in the short, medium and long term?*

Development of <IR>

23. *If the IIRC were to develop explanatory material on <IR> in addition to the Framework, which three topics would you recommend be given priority? Why?*

Other

24. *Please provide any other comments not already addressed by your responses to Questions 1-23.*

More guidance on the requirements for the planning and control cycle that is required to be able to deliver an integrated report would be helpful. I.e. process guidance.

Please save the completed PDF form to your computer and submit via the IIRC website at www.theiirc.org/consultationdraft2013
